

## Your boat's gelcoat finish

The unique coating that makes up your boat's beautiful exterior is the result of many years of gelcoat research, testing and development.

The gelcoat is actually a thin surface coat of a specially pigmented polyester resin used in hand lay-up and spray-up fabrication to provide an attractive and weather-resistant surface to finished parts.

HanseYachts AG knows gelcoats. You can rest assured that your boat is protected with the industry's top-performing gelcoat – providing state-of-the-art protection against ultraviolet radiation and salt water while ensuring the flexibility and toughness required for the demands of boating.

## Built to last

Gelcoats with LE technology have been formulated to meet the toughest requirements set by classification societies, like Lloyd's Register of Shipping, Det Norske Veritas, ANSI, etc.

## Gelcoat care and maintenance tips

We hope that you follow these tips on gelcoat care and maintenance, which will help to preserve the beautiful appearance of your boat.

- Keep your boat cleaned and waxed.
- Wash your boat with only mild, non-abrasive detergents.
- Wax the exterior of your boat at least twice a year.
- Clean and wax your boat prior to placing it in storage.
- Use only a high-quality automotive wax in accordance with application instructions provided by the manufacturer.
- Remove any small scratches or scuffs using a fine rubbing compound. For any major repairs, consult your authorized dealer.
- Cover if possible to keep your boat looking its best. Store in a dry, covered area.
- Never use any abrasive cleaners or brushes on your boat's exterior surfaces.
- Remove any unintentional fuel or oil spills from the gelcoated surfaces as quickly as possible.
- Give your boat a fresh water wash after saltwater use.
- Never place a non-breathable cover on a boat that is still wet.
